Remarks: Attached is a Work Order Amendment for additional services at the Bremerton Gas Works Brownfield site. We understand that the City of Bremerton ("the City") has allocated \$183,500 of a \$200,000 EPA Brownfields assessment grant for engineering consulting and assessment services. Anticipated services to be provided to the City under this contract include:

1. Preliminary scoping of assessment activities with the City, the property owners, and the EPA (completed),
2. Oversight of a portion of the initial soil and groundwater assessment, and
3. Preparation of a RI/FS and CAP document based on the data acquired by both GeoEngineers and the EPA's contractor.

It was agreed upon in scoping meetings that GeoEngineers would conduct the initial source area assessment, and the EPA's contractor would provide the additional delineation data through an EPA Targeted Brownfield Assessment.

GeoEngineers suggests using the attached Work Order Amendment form to track scope and budget for this project. Approximately \$15,000 has been expended to date on this project.

Signed:

Sean P. Trimble, LG and Dave A. Cook, LG, RBP
